

Clearing Cache

3/24/05

Sometimes things get jumbled in CM/ECF and it is necessary to clear your cache. Please follow the procedure below to clear your cache:

- Open your Internet Browser
- Click on **Tools** which is located on the **Task Bar**
- Click on **Internet Options**
- Make sure you are in the General folder
 - Click on **Delete Files**, which is located under Temporary Internet Files
 - Click on the **white box** next to Delete all offline content
 - Click on the **OK button**
 - An hour glass will display. Your cache is cleared once the hour glass disappears. This may take awhile so be patient.
- Click on the **OK button**
